DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

A. Single agent as recited in claim 91 or a plurality of agent (i.e., combinatorial library) as in claim 93.

B. Matrix material as recited in claim 97, i.e., a specific matrix material.

C. Energy absorbing molecules i.e., a single disclosed species of energy absorbing molecule.

D. Agent i.e., a species of small organic molecule.

E. Detectable moiety as recited in claim 88.

F. Receptor whether cell surface or intracellular or within a cell membrane.

G. Elect a substrate-docked ligand with or without a linker. If with a linker, elect a species of a linker i.e., if bifunctional a species of bifunctional moiety.

H. Fusion or non-fusion protein as recited in claim 87 or 91. (Note the Office action of 12/8/99 where restriction of this species was made. The reintroduction and action on these withdrawn species in the Office action of 5/21/02 is regretted).

Art Unit: 1639

Each of the species in each of the given subgroups above differs in structure and possibly mode of action. A prior art reference anticipating one species would not render obvious the other species.

Applicant is required under 35 U.S.C. 121 to elect a ***single disclosed species from each of the subgroups A-H*** for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 91 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. ~~MPEP~~
§ 809.02(a).

Art Unit: 1639

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to T. D. Wessendorf whose telephone number is (703) 308-3967. The examiner can normally be reached on Flexitime.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Wang can be reached on (703) 306-3217. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
